

The Southbound Truck Route Traffic Plan on the Mexican Side

As you may recall, there will be major changes to our southbound truck route in Otay Mesa starting **February 15th**. Likewise, in Tijuana, there is a new route for empty trucks only and it is outlined below:

- 1) Empty trucks heading towards the Airport or downtown -estimated at 20%- will use *Fray Mayorga Street* until reaching *Via de la Juventud Oriente*.
- 2) Empty trucks heading east will also exit *Fray Mayorga Street* but turn left on *Jose Maria Salvatierra Street*, which will now be a one way street, and then turn right onto *Alejandro Humboldt* and from their turn right again to reach *Bellas Artes street*.

This is a temporary measure until the City of Tijuana and State of Baja are able to secure funds for the access project planned for Sebastian Vizcaino and Via Internacional. The access project has been in the books for several years now and the Mexican authorities have been unsuccessful in obtaining funding for this project. Clearly, the community needs to be more active in ensuring this project is both a priority for the State and City government.
