

Azzur Group to Celebrate Grand Opening of New San Diego Cleanrooms on Demand™ Facility on April 29, 2021

SAN DIEGO, March 25, 2021 /PRNewswire/ -- [Azzur Cleanrooms on Demand™](#), a market-leading provider for early-phase life sciences GxP manufacturing, recently completed the design and construction of their second facility. The new facility is located in Vista, California. The Grand Opening and Ribbon Cutting Ceremony for this new facility will take place on Thursday, April 29th. Event begins at 11:00am with introductory remarks, immediately followed by the formal ribbon cutting.

Azzur Cleanrooms On Demand San Diego, located in Vista, CA

Azzur Cleanrooms on Demand™ San Diego is the Group's second cleanroom facility, an expansion of their initial offering in Waltham, MA, established in 2018. Azzur's hybrid model includes turnkey GMP support: on-demand cleanroom facilities, materials management, storage, asset management, and supply chain solutions. Azzur Group's portfolio—Azzur Cleanrooms on Demand™, Azzur Advisory and Consulting, Azzur Labs, and Azzur Training Center—enables companies to focus on groundbreaking science and early-phase cGMP manufacturing without the burden of facility ownership and maintenance.

Built on best practices gleaned from the original location in Waltham, MA, the new Azzur Cleanrooms on Demand™ San Diego features a 30,000 square-foot facility consisting of 11 cleanrooms, on-site storage, and laboratory space. The facility is designed to increase best-in-class services to the area's life sciences and pharmaceutical innovators and start-ups, with room to expand as demand grows.

Azzur chose San Diego because of the growth in the biotechnology and pharmaceutical sectors in the area. Azzur Cleanrooms on Demand™ is conveniently and strategically

placed adjacent to Azzur Labs, allowing clients to have access to comprehensive services for their pharmaceutical and therapeutic manufacturing needs.

"With the explosive growth in novel therapeutics, such as cell and gene therapy and microbiome-based therapies, the Azzur Cleanrooms on Demand business model is poised to accelerate time to clinic and market for such products in key biotech clusters, including San Diego," said [Ravi Samavedam](#), President, Azzur Cleanrooms on Demand™.

"We are very excited to bring our game-changing model to the rapidly growing San Diego market. This new facility, combined with Azzur's expertise in cGMP compliance, will give our clients a great strategic advantage by accelerating their pathway to the clinic for critical therapies," said [Dan Dernbach](#), Vice President of Operations, Azzur Cleanrooms on Demand™ San Diego.

In addition to the opening of its San Diego facility, Azzur Group plans to open its third facility in Burlington, MA in the second half of 2021, with plans for further national expansion throughout 2022.
